SUMMARY

I am an Informatics graduate with hands-on experience in frontend development and web application development. I have experience building responsive and user-friendly web applications using modern frontend technologies, with a strong focus on performance, maintainability, and user experience. I have a solid understanding of programming principles and enjoy turning designs and requirements into functional, intuitive interfaces. With a growth mindset and strong collaboration skills, I am eager to contribute to development teams and continuously improve my skills in the evolving field of web development.

EDUCATION

TELKOM UNIVERSITY

Bachelor of Informatics

Major in Informatics

Relevant Coursework: Database System, Software Analysis and Design

Bandung, Indonesia

Sep 2021 - May 2025

EXPERIENCE

Telkom University

Dataset Collector, Data Entry, Frontend Developer, Backend Developer

Bandung, Indonesia

- Collaborated with SDGS Telkom University's "Carbon Ranger" to collect field data.
- Responsible for entering relevant and accurate data into the SDGS Multiclass Classification Website project system.
- Responsible for designing and developing responsive interfaces using HTML, CSS, and Bootstrap.
- Internal internship as a Backend Developer, developing a coffee competition website using Express.js and MySQL, ensuring robust functionality for user interactions and event management.

Bangkit Academy 2024 by Google, GoTo, Traveloka

Cloud Computing

Bandung, Indonesia

Feb 2024 – Jun 2024

- Building the backend of the fruit detection application using Express.js
- Connecting the backend to Google Cloud Platform
- Engaged in continuous learning through mentoring sessions provided by industry experts

PukulEnam

Frontend Developer (Internship)

Bandung, Indonesia

Sep 2024 – Dec 2024

- Contributed to the SatriaBIPA project as a Frontend Developer, using HTML, CSS, and Tailwind to develop the appearance of the SatriaBIPA website.
- Contributed to the Talas project by developing a news crawler integrated with the database

Fullstack Developer (Fulltime)

Remote

Mar 2025 - Jun 2025

- Contributed to the Talas project integrated with a database using React JS.
- Built a static website for booking tours in Bali using React JS
- Developed a website for dog adoption using Laravel

Telkom Indonesia - Digistar Program

Backend Developer Mentee

Bandung, Indonesia

Aug 2024 – Oct 2024

- Developed and documented a RESTful API using Express.js and MongoDB, tested with Postman
- Gained experience in API development, database management, and backend best practices with RESTful design and MongoDB queries.
- Contributed to the development of the product catalog feature for the PADI UMKM website, working collaboratively with the team to implement the given functionality.

Duluin Group

Website Developer (internship)

Bandung, Indonesia

Oct 2025 – Dec 2025

- Developed and maintained corporate profile websites for [SAUCA](#), [Sentro Care](#), and [Nooren](#), including responsive user interfaces, content management integration, and performance optimization to strengthen company branding and online presence.
- Revamped the Career Page of [Duluin](#), improving user experience, visual presentation, and recruitment information accessibility to support talent acquisition initiatives.
- Designed and developed the [SKI One Service](#) platform, including both a public-facing landing page and an administrative dashboard for operational management, data monitoring, and service workflows.

Website Developer (PKWT)

Jan 2026 – Present

- Developed and integrated frontend interfaces with backend APIs for BNI Ventures, ensuring seamless data communication, responsive user experience, and reliable system functionality.
- Designed and developed the [Satu Creative platform](#), including a landing page and internal dashboard used by Duluin's creative team to manage workflows and operational activities.
- Built the [Workin](#) landing page to support product promotion, user engagement, and brand awareness initiatives.
- Developed a [Whistleblowing System \(WBS\)](#) for Duluin, enabling secure and confidential reporting of workplace concerns, with features for case management, report tracking, and administrative oversight.
- Developed and maintained company profile websites for various clients, including [PT. Satria Enam Putra Perkasa \(SEPP\)](#), [Baksya](#), [Elang Security Nusantara](#), [JGR Garmen](#), [Dito Anurogo](#), and [PT. Soffalux Berkah Jaya](#), [PT. Coway International Indonesia](#), [SUTA](#), [Nawa Multi Parts](#). Delivered responsive, SEO-friendly, and performance-optimized websites tailored to each organization's branding, services, and business objectives.
- Collaborated with stakeholders to gather requirements, translate business needs into technical solutions, and ensure successful project delivery.
- Implemented responsive web design, API integrations, SEO best practices, and performance optimizations across multiple web projects.

SKILLS

Technical Skills: Experienced with HTML, CSS, Javascript, Laravel, MySQL, Bootstrap, TailwindCSS, Responsive Design, React, NextJS, Selenium

Environment: Visual Studio Code, GitHub, Postman, MySQL Workbench,

Soft Skills: Leadership, Communication, Analytical thinking, Problem solving

PROJECTS

FreshBite

Capstone Product Bangkit - Cloud Computing

Repository : <https://github.com/SryoAji/FreshBite-Bangkit-Capstone>

- FreshBite is a mobile-based application designed to assist users in detecting whether a fruit is fresh or rotten. The function is, Users can take a photo of the fruit they want to check then the application will analyze the image and provide information whether the fruit is still suitable for consumption or no longer fresh, using Express.js on the backend for efficient and scalable performance.

BrewFest

Kerja Praktik - Backend Developer

Repository : <https://github.com/DarmaCahya/Coffee-Event/tree/master>

- Developed the backend for BrewFest, a competition website for judges to evaluate coffee entries, using Express.js and MySQL. I implemented user authentication (restricted to judges only) and managed event data. Additionally, I utilized Selenium for automated testing of authentication features, ensuring correct handling of valid/invalid inputs, empty fields, and edge cases. Test cases and results are available in the repository.

Padi UMKM - Catalog Product Feature

Backend Developer

Repository : <https://github.com/DarmaCahya/project-team-digistar>

- Developed and documented a RESTful API using Express.js and MongoDB for the PADI UMKM website, enabling users to view and interact with the product catalog. I focused on API development and database management, and tested the API functionality using Postman to ensure everything was working as expected.

Freelance

Frontend Developer

Link: grhunt.communal.id & <https://medikaone.com/> & <https://survey-website-one.vercel.app/>

- Developed a web app for a communal event that enabled participants to scan backend-generated QR codes for fast and efficient attendance tracking, without requiring authentication.
- Developed a responsive landing page for MedikaOne, a health application.
- Developed a survey website as part of a final-year academic project to collect cybersecurity data from Small and Medium-sized Enterprises (SMEs/UMKM).
- Built an n8n automation workflow for social media competitor analysis by scraping data through Apify, using AI to extract content insights, and exporting the results to Google Sheets for reporting.
